AUBURN

SonarQube - SAST Tool

Broken Window Theory

AUBURN

Neglected environments give the impression not one cares.

What is SonarQube SAST Tool

AUBURN

- Support for most modern programming languages
- Utilizes database to keep track of history and issue resolution supporting new code vs. existing code analysis
- Integrates with all modern CI/CD tools
- Open source and commercial versions
- Constantly evolving ruleset with customizable rules
- Standardized metrics
- Ability to fail build pipelines
- Drill down and highlighting of source code issues with description and resolution
